

SPOTLIGHT ON:

Dr. Sandeep Kulkarni

Dr. Kulkarni has over 20 years of industry experience working for several large packaging companies, such as International Paper and Georgia Pacific. He developed packaging that resulted in over \$25 MM in revenue for these companies. Most recently he worked for PepsiCo, in the area of sustainable beverage packaging. Dr. Kulkarni has 7 granted patents as well as several publications in industry journals.

The Packaging School partnered with thought leader, Dr. Sandeep Kulkarni, to provide a sound introduction to the area of bioplastics. The goal is also to provide guidance in the use of these materials for packaging applications in order to address some of the global sustainability issues. There is widespread confusion regarding bioplastics, what they are, how they are made and what happens to them at the end of their useful life. We aim to change that.

BENEFITS OF PARTNERING AS A THOUGHT LEADER

- Immediately plugged into a GLOBAL captive audience
- Access to high-end production/creative team
- Platform to communicate your message
- Ability to monetize your expertise
- Reinforces your position as a thought leader in a booming industry
- Actively be involved in bettering this industry as well as the lives touched by it

**If you want to help change the world by way of packaging,

I think there is a finite amount of resources we have on the earth. It makes me think about what kind of world my 8-year old will be living in and are we leaving the right legacy for her? I want to address the benefits of bioplastics and how they could play a role in a company's sustainable packaging strategy.

Dr. Sandeep Kulkarni
